Safari in Serengeti National Park (UNESCO World Heritage Site) – The word “Serengeti” was derived from the Masai language, meaning “endless plains”. Serengeti remains outstanding due its beauty and being a home to the Great Wildebeest Migration: The huge herds of plains game such as wildebeest, zebra and antelope dominate the park whereas the attendant predators such as lion and cheetah are often overseeing the plains from the many kopjes scattered across. The park’s savannah-wood-landscape is composed of open grass plains, savannah with scattered acacia trees, hilly, wooded grassland as well as, extensive woodland and black clay plains. Serengeti is also renowned for vast wildlife populations: a record 2 million+ ungulates, 4000 lions, 1000 leopards, 550 cheetahs and over 500 bird species, inhabiting a close to 15,000sq.km area – a great opportunity to witness an iconic Great Migration on your safari adventure!
